Summary

Senior Frontend Developer with over 6 years of total experience, specialising in leading SaaS projects and delivering top-notch frontend solutions. Proficient in building complex designs and creating exceptional user experiences. Skilled in Typescript, React 16.8+, JavaScript (ES6/ES7), and utilising React hooks for efficient development.

Career Highlights:

- Spearheaded and led frontend development in multiple SaaS projects, ensuring seamless integration and successful delivery of high-quality applications.
- Conceptualised and implemented innovative UI features, resulting in improved user engagement and a more intuitive user interface.
- Achieved consistent success in delivering projects on time, earning recognition for exceptional project management and leadership.

Key Skills:

- Proficient in Typescript, React, and JavaScript, with a strong grasp of React hooks for enhanced development efficiency.
- Expertise in utilising styled-components and BEM methodology as well as frameworks like Tailwind to maintain clean and modular CSS code.
- Proficient in Git for version control and collaborative development.
- Demonstrated ability to create responsive layouts based on Figma designs, ensuring a seamless user experience across devices.

Experience

Lead Full Stack JS Developer

ElevenYellow Pte. Ltd.

Jun 2021 - Present (2 years 2 months)

I have been the driving force behind the implementation and delivery of the majority of their frontend projects.

Consistently taken the lead in creating web applications and ensuring a seamless UX/UI, using responsive layouts made on Figma.

Some of the projects:

- Botto: <https://www.botto.com/>
- Switchchain: <https://www.switchchain.com/>
- Twistme: <https://twist.me/>

Some of the tools:

- ReactJS, NextJS, Tailwind, React-Query, SvelteKit

Secondary projects:

- Several backend tasks like creating functionalities from scratch using NodeJS,

- Interacting with DBs creating MongoDB queries,
- Progressive Web Apps (PWA) to be used in exhibitions related to Botto
