Education

Udacity

Mobile Web Specialist Nanodegree, Computer Technology/Computer Systems Technology ~ 2018 - 2018

Universidade do Algarve

Faro, Portugal

Nível 5 de Qualificação, CET - Telecomunicações e redes

2009 - 2014

Licenses & Certifications

C1 Google Developer Challenge Scholarship - Udacity

Issued Nov 2017 - Expires Feb 2018

C2 Mobile Web Specialist - Udacity

D7GPPPAR

Experience

Senior Frontend Developer

Beyond

10/2023 - 05/2024 (8 months)

I was part of a skilled team of developers responsible for the complex migration of a large-scale codebase from CakePHP at GotPhoto to a modern technology stack. This included integrating Next.js and GraphQL as middleware to interface with a new Symfony REST API, and utilizing Storybook for our UI library management. I contributed to maintaining high standards by implementing Jest for testing, ensuring coverage exceeded 90%.

- Legacy Systems Expertise: Interpreting PHP code and handling some of the most complex aspects of the legacy application
- UI/UX Innovation: Created UI components, including complex ones like drag-and-drop interfaces, demonstrating creativity and technical expertise in user interface design.
- Modernization and Refactoring: Converted old JavaScript and jQuery logic into new functional JavaScript in Next.js, modernizing the codebase and enhancing application scalability and maintainability. Mickael Neves - page 1
- Backend Integration Specialist: Working closely with the backend team to debug and successfully integrate new endpoints, ensuring seamless data interaction.
- GraphQL Development Proficiency: Developing and maintaining robust GraphQL schemas, queries, and mutations to optimize system performance and data management.
- Quality Assurance and Feature Development: Addressing bug fixes, performing code reviews, and developing new features to enhance functionality and user experience.
- Agile Team Collaboration: Working collaboratively within an agile framework, aligning closely with team goals and adhering to project timelines.

Senior Frontend Engineer

ElevenYellow Pte. Ltd

12/2019 - 10/2023 (4 years)

In my role as a front-end specialist, I've driven several key projects and collaborated closely with design and management teams. My contributions include:

- Pivotal Contributor: Spearheaded the implementation and delivery of the majority of our frontend projects.
- Web Development Expertise: Consistently led the creation of web applications, ensuring a seamless UX/UI experience.
- Figma Mastery: Leveraged Figma to design and visualize responsive layouts, underscoring my adeptness at both design and development.
- Team Collaboration: Fostered effective communication and alignment with designers and project managers, optimizing our frontend development process.
- Adaptive Approach: While primarily focused on the frontend, I've demonstrated versatility by stepping in to handle backend features when needed.

Frontend Engineer

ACIN

09/2018 - 07/2019 (11 months)

As a key member of the iMED Team, a forerunner in Portugal's Clinical Management Software solutions, I embraced several pivotal roles:

- Customer Support & Deployment: Managed customer support and oversaw production deployments, ensuring streamlined operations.
- Legacy Code Migration: Took the lead in transitioning legacy code to React, which involved code restructuring, styling, and meticulous testing using Jest.
- Team Leadership: Directed a team of 2 junior frontend developers, ensuring the successful and timely launch of key projects.
- Code Transition & Optimization: Solo-handled the shift of legacy code to a new development environment, refining its readability and bolstering team efficiency.
- Mobile Application Development: Pioneered the development and launch of a React Native application, now accessible on both Google Play and the App Store.

Full-stack Developer

ACIN

04/2017 - 09/2018 (1 year 6 months)

Full-stack developing using LAMP stack with Laravel framework, maintaining legacy code.

Web Developer

Freelancer.com

04/2016 - 04/2017 (1 year 1 months)

Gigs and small projects / bug fixes

IT Technician Specialist

Portugal Telecom

2011 - 2016 (5 year)

Installation and maintenance of all services associated with client's network, such as: MEO, MEO Fiber, ADSL Service, ISDN Service, Telephone Fixed Service.

Telecommunications Technician

Certigarve

07/2006 - 10/2010 (4 year 3 months)

Assembly, connection and programming of fire detection systems, security against theft and telephone services (VOIP) Repair of electronic equipment Installation and adjustment of terrestrial and parabolic antennas Structured Networks

Awards and Honors
